

# RESEARCH PROJECT 2022-2023

---

## Department/Area

Mechanical Engineering, Biomechanics

## Title/Name

Digital analysis of teeth structure

## Abstract/Description

The main task of this research project is the digital analysis of the material structure of teeth obtained by CT-scan. The purpose is to identify the features and flaws which leads to structural weakening after endodontics.

## Prerequisites

Required	Digital skills
Recommended	Material mechanics

## Supervisor(s)/Tutor(s)

Name(s)	Saúl Dorado / Jesús Jiménez
Email(s)	<a href="mailto:smdorado@icai.comillas.edu">smdorado@icai.comillas.edu</a> / <a href="mailto:joctavio@comillas.edu">joctavio@comillas.edu</a>

## Structure

Format	Summer (intensive, preferably 8 weeks)
Workload	100 hours (4 ECTS)
Students	3
